

Hydrobox for monobloc heat pumps

Hydrobox is a device that speeds up the installation and helps to organize the heat pump's engine room.

The aesthetic housing contains the most necessary elements, such as a 3-stage flow heater with thermal protection, a manometer, a CH/DHW zone valve, a safety valve and a switchgear with an overcurrent circuit breaker and contactors.

COMPATIBLE WITH MANY HEAT PUMPS MODELS

SIMPLE CONTRUCTION CONTAINING MOST NECESSARY COMPONENTS

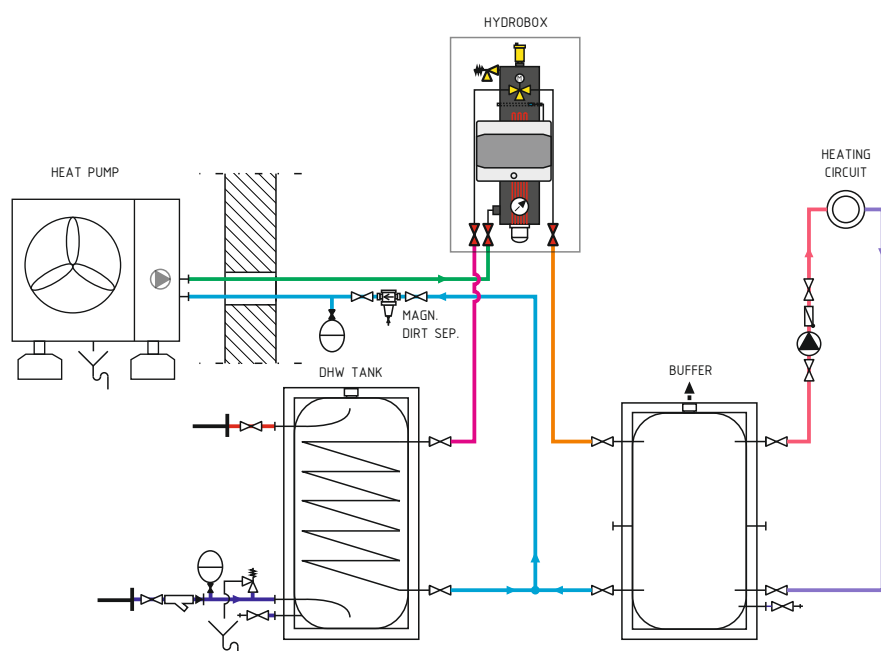

MODERN AND PRACTICAL HOUSING DESIGN

Hydrobox for monobloc heat pumps

Basic information

Housing	Powder oated steel plate
Dimensions	690x450x290
Weight	20 kg
Max. operation pressure	3 bar
Hydraulic connections	DN25, Rp 1"
3-way zone valve	230V, 15s, Kvs=11,3 ³ /th
Thermal cutuot threshold	~80°C
Inne diameter sensor capillary	8 mm
Manomeër	0-4 bar
Heater	3 x 2000W
